New Officals Elected For Skating Rink

Enthusiastic Meeting was Held Last Monday.

At the meeting held last Monday evening the skating Rink association was recognized for this season and, judging from the interest and enthusiasm shown by a number of the young men in town, there is no doubt that the season's operations will be carried through sucessfully provided they get the support which the organization deserves.

The following officers were elected:

Hon. Pres.— Rev. R. E. Pow
Pres.— Basil Moore.
Secy.— Owen Wooding
Treas.— H. M. Sangster
Ex. Com.— R. Simpson, Joe Podesta, Jim Podesta, B. Woodcock and B. Taylor.

The matter of arranging for season tickets, light, stoves etc. was left to the officers.

Votee of thanks were passed to the Gas Co. for the genreous offer made by Mr. Hodge to supply gas, and to the town council for their assistance last season.

After the general meeting the executive met and decided to put on a whist drive and dance in Cliff Hall on Friday evening Nov. 21st.

Now that the organization is away to such a promising start it is up to the citizens to give the new officials all possible support and encouragement.

In Grannie's Garden

The following poem was written by Mildred Walton a 12 year old pupil in grade eight at our school here.

In Grannies Garden

In Grannie's garden, sweet and true,
There blooms a rose and violets blue;
A lily and sweet hollyhocks,
Lilacs tall and rows of phlox:
Yellow pansies, and tulips rare,
Stocks and asters they all bloom there.
In Grannie's garden the grass is tall,
It's almost up the garden wall,
Hedges guard the springing flowers;
The sundial tells the passing hours;
Life is happy, true and free
Grannie's gardens the place for me.
Is Grannie's garden the children's play,
Always happy, blithe and gay,
Birds sing songs from morn till night,
Oh! 'Tis a sweet and pretty sight
'Tis always bright, 'tis always gay,
From earthly dawn till close of day.
If you should pass along that way,
Just step inside, a call to pay,
That memory will live for years;
And cheer if you have cause for tears,
And after time has pased away,
These memories with you will stay.

CANADIAN STAND IS GIVEN AWARD

The Canadian stand at the Ideal Homes Exhibition at Edinburgh Scotland has been awarded the gold medal for general excellence beating out 100 other exhibitors. The stand was prepared by the Dominion Government Exhibitor Commission.

Social Evening For The Skating Rink

Whist Drive and Dance Friday Nevenber the 21st.

The newly elected officers of the Skating rink are putting on a Whist Drive and Dance in Cliff Hall on Friday evening Nov. 21st Good prizes are being offered for whist winners and lunch will be served at midnight.

As this event is being put on to raise funds for operating the rink it is hoped every home in town will be represented at it. The hearty co-operation of our citizens is necessary to make the rink a success.

Militia Notes

The Rifle Shoot at the Armories last night was well patronized. Over 14 marksemen did their stuff on the range. The boys are in good condition for the Turkey Shoot to-morrow night. Be sure and be there as there will be some good scores. A strong aggregation will be up from Medicine Hat but our local boys will hold them pretty even.

Everyone is Welcome to participate in this shoot so come on over and take a Turkey home for Thanksgiving.

Last nights score were as follow:t:

Officers & N. C. O's of "C" Co.

1. Lance-Seargent Amdahl . 21
2. Corporal Podesta 20
3. Seargent Balmer 18
4. Q. M. Seargent Cook 12
5. Bugler Podesta 12

Outsiders:

1. Bud Reeves 18
2. Ross McKay 18
3. Joe Podesta 17
4. Mrs. Reeves 17
5. Bill McCleary 7
6. Len Larson 6
7. Langely Stone 5
8. Ross McLachlan 2
9. E. Bainbridge 2

Don't forget your entries for the Turkey Shoot must be in before 7 o'clock to-morrow night Get them in and get a Turkey for two-bits.

At the seed grain fair in Medicine Hat last week C. Welter, Redcliff, got third prize for Dent corn and third prize for Flint corn.

Harvest Vale U. F. A. Holds Monthly Meeting

W. C. Smith, M. L. A., and J. Fowley Present.

At a meeting of the Harvest Vale U. F. A. local held here last week J. Fowley, district director of Medicine Hat federal district was present and addressed the meeting. He strongly advised keeping the organization alive by making an effort to get new members and keeping old members intersted in the work of the local. He reminded them that while the organization had done much good work there was still much to be done and that this could be accomplished only by co-operation in the activites of the several locas

W. C. Smith M. L. A. was also present and addressed the meeting. He gave a review of legislation pased at the last meeting of the legislature. In dealing with the resolutions passed at the last meeting of this local he said he thought that the commission had modified its methods considerably and were now more inclined to meet the wishes of the farmers in the district concrened. Mr. Smith though tha with a little more patience ad forebearance the problems would be settled satisfactorily.

As there was not a full turnout of members of the local present several resolutions which had been prepared were left over till the next meetisg.

C. Axelson of Bingville was present and gave a review of the work done at the convention. He also explained the misunderstanding which developed at the convention. He strongly urged loyalty to the U. F. A. and the Wheat Pool.

Langley R. Stone returned home from Winnipeg last Tuesday.

* * *

Keep in mind the Turkey shoot in the Armories on Friday night of this week.

* * *

Officers of the local Sons of England have decided to hold an Armistice dance in Cliff Hall on Monday, Nov. 10th. As that will be a splendid occasion for celebrating it is expected to be well patronized.

Memorial Service At St. Ambrose Church

Sunday Nov. 9th., Sunday Next Before Armistice Day.

A Special Service in memory of those who gave their lives in the Great War will be held in St. Ambrose Church on Sunday next at 7:30 in the evening. Special music will be rendered and the service will conlude with the sounding of the Last Post in honour of our Glorious Dead.

Returned soldiers and the relatives of those in whose memory the Service is held are especialy invited to attend,

Rev. P. Malcolm Stewart, Vicar

High School Pupils Entertain Parents

Dramatize Selections from Literature Very Acceptably.

Citizens of the town who did not accept the invitation of he High School Literary Society to be present at their meeting in the School last Wednesday afternoon missed a rare treat. The dramitization of two Shakesperian selections which the pupils take up in their literature was exceptionally well put on by the pupils taking part. "The Quarrel Scene" from Julius Caesar & **"the Trial Scene" from "The Merchant of Venice"** were acted by the pupils in a manner which showed rare talent and reflected great credit on the principal who trained them. The memory work and acting was wonderful for pupils of the age of those who took part.

Parents and citizens generally are making a big mistake in not showing more interest and cooperation on occasiess of this kind.

Dr. Ward received word last Sunday announcing the death of his brother Joseph, age 28. Deceased had visited his brother her for a few days the previous week.

* * *

School will be closed to-day and to-morrow as all the teachers are attending the convention in Medicine Hat. As Monday is Thanksgiving Day there will be no school till next Tuesday.

Cameo To be Open Next Wednesday

The 20 choir boys appearing in the gorgeous wedding scene of "Such Men Are Dangerous," Fox sophisticated drama adapted from Elinor Glyn's widely read magazine story, are the pick of a choir of 90 young men who sing in a Hollywood Church.

These youthful singers are known as "Father Neal Dodd's Boys" and "Father" Dodd is the rector of St. Mary of the Angels Episcopal Church, known in the motion picture colony as "the little church around the corner."

Rev. Dodd who has appeared in many motion pictures, performs the wedding ceremony in "Such Men Are Dangerous," which unites Warner Baxter and Catherine Dale Owen, who play the leading roles in this romantic and thrilling screen epic.

Supporting Baxter and Miss Owen is a cast that includes such well known screen personalities as Albert Conti, Hedda Hopper, Claude Allister and Bela Lugosi.

This picture will be shown in the Cameo here next Wednesday November the 12th.

Here and There

(6417)

His Honor R. Randolph Bruce, Lieutenant-Governor of British Columbia, his niece and chatelaine, Miss Margaret Bruce MacKenzie, and Lady Rosalind Northcote, guest at Government House, lent their presence to the list of more than 350 guests at one of the major functions of the Vancouver social season when Triple Entente Chapter Imperial Order of Daughters of the Empire held their ball aboard the Canadian Pacific liner, Empress of Japan, recently, on her second visit to her home port. The newest and largest liner on the Pacific coast was in gala attire for the event.

Sweeping changes in operating methods affecting handling of Canadian Pacific trains throughout the west can be expected in the next few months, W. M. Neal, general manager of the company's western lines, announced recently. Locomotives will pull trains over several divisions instead of over a single division, permitting the railway to make use of its newer and more powerful engines capable of hauling a train more than 1200 miles instead of about 125 miles under the present divisional system.

Outmatching all other entrants to the British Columbia Boys and Girls Swine Club second annual judging contest held near New Westminster recently, Ernest Naughton and Wilbert De Leeuw, 14-year-old livestock experts of Ramloops, annexed the Canadian Pacific Railway cup and medals, as well as a free trip over the company's lines to Toronto to attend the Royal Winter Fair where the final judging contests of the Dominion Boys and Girls Swine Clubs will be held.

Interviewed as to a press despatch that the Consolidated Mining and Smelting Company had large stores of rare metals and was reducing wages, J. J. Warren, president of the company, said that at the end of September a little more than half a month's production of lead was on hand unsold and a little more than two months' production of zinc, while October sales had been heavy. He added that while the metal bonus paid employees varied with metal prices from month to month, the base wage scale had not been cut.

An indication of the value of Canadian agriculture is given in a recent official estimate of the agricultural wealth of the Dominion. Total value is placed at $7,978,639,-000 of which $2,316,601,000 is for lands.

Patrols carried out by the Royal Canadian Mounted Police by dogteam and boat in the eastern and western Canadian Arctic during 1929 totalled approximately 25,000 miles, sufficient to circle the globe at the equator.

A total of 261 pupils have been enrolled and 1,200 application forms have been sent out in response to requests in connection with a correspondence course by which the Saskatchewan Department of Education has made high school instruction available to all students in the province unable to take advantage of the ordinary facilities.

Great Bear Lake, in the Mackenzie district of the North-West Territories, Canada, is the largest lake wholly within the Dominion. Its area is approximately 12,000 square miles.

Vega Lodge Holds Successful Dance

Good Crowd and Splendid Costumes at the Masquerade.

Cliff Hall was filled last Friday evening for the Hallowe'en Masquerade ball given under the auspices of Vega Rebekah Lodge

The costumes were numerous and of various kinds adding much to gayety of the hall and the delight o the spectators. So well did those in costume portray their different characters that the judges experienced considerable difficulty awarding the prizes.

The following were the prize winners:

Ladies Character Costume— Mrs. Bell as Britannia.

Best Ladies Home Made Cosume— Evelyn Jones as Autumn.

Best Ladies Comic— Mrs. Toul Medicine Hat as old Woman out Shopping.

Men's Character Costume— Owen Wooding as "A Russian."

Best Men's Home Made Costume— Harry Grant and F. Scott of Medicine Hat as girl and boy.

Men's Comic— Roy Simpson as "Old Maid."

The Judges were Miss Broadfoot and Messrs. J. Tarrant and F. Baird.

After the judging refreshments were served and the dance continued.

The evening was a great success and all present thoroughly enjoyed the program.

FOR SALE— For nice clean bright wheat straw see Jacob Landis.

Marble Pool on Palatial Liner

The cautious miss in the corner (left) who evidently does not believe the assurances of the two already in the tank that the water is warm need not test it for one of the features of the 24,000 ton liner is that the golden dolphin seen in the background spouts warm or cool water as desired. One hundred and sixty tons of water are needed to fill the tank.

Surrounded by dressing rooms, showers, and electric baths, the swimming pool has its own cafe with rubber-cushioned chairs where attendants serve warming drinks with Oriental impressivity.

Above or below decks there is lots of fun on the Canadian Pacific's new record-breaking Empress of Japan, largest, fastest and finest ship on the Pacific, recently arrived passengers said at Vancouver.

One favourite meeting place is the white and green marble swimming pool, shown above with a happy group enjoying its spacious tank.

Harsh, Griping Purgatives Are Dangerous!

Cheap, harsh laxatives may prove very costly. Painful rectal troubles are often aggravated by the unnatural griping condition such cathartics cause.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S "FRUIT SALT"

Our National Parks

On May 9th of this present year, a Bill to be known as the National Parks Act passed the House of Commons and was shortly afterwards ratified by the Senate and signed by the Governor-General.

This marked the beginning of a new era for the National Parks of Canada. They have now reached that state of importance in the administrative eye which entitles them to a separate Act. Formerly they were simply an afterthought administered under the Dominion Forest Reserve and Parks Act. No longer can they aptly be compared with the house which was built upon the sand. The new National Parks Act is the rock upon which will be built a park system of which Canadians for all time will be justly proud, a system which will endure, a system having the stability of a mountain. No longer will the parks boundaries and policy of administration fluctuate with the rise and fall of the various political parties in power at Ottawa, because they can never again be made the political policy of any party, but are the policy, property and pride of each and every individual Canadian in this broad Dominion.

By the former Act all matters affecting parks were under the direct control of the Minister of the Interior through the Parks Branch, and an order-in-council could without the consent or even the knowledge of Parliament establish new parks, relinquish all or part of the present parks, sell or lease any water power, timber berth, mining claim, or other commercial concession in the boundaries of any park.

By the new Act, thirty days' notice of any such matter affecting the parks must be published in the Canada Gazette, and then the matter takes the form of a private bill and may be thoroughly discussed by the people's representatives in Parliament before becoming law. Surely a reasonable way of dealing with park areas which belong not to any individual community or province but to the people of Canada as a nation.

It is well that such protection has been thrown around our great and expanding system of National Parks, because as population increases and the country becomes more and more industrialized, efforts to secure portions of National Parks areas for purposes of commercial exploitation become more numerous and harder to resist. Yet they are the very heart of the beauty, and therefore the value, of our National Parks is not to be destroyed.

As water is the life of all landscape pictures, so lakes, waterfalls and rivers are often, and generally, the chief attraction in a National Park. Destroy their natural beauty, and the park itself is largely destroyed. Nevertheless water-power companies become insistent upon securing rights to utilize these water powers for hydro-electric purposes. Already a large area has been taken out of Banff National Park, the Spray Lakes area, for hydro development, and now the hydro interests demand the famous Lake Minnewanka district in the same park.

Once embark on a recognized policy of alienating water-powers in our National Parks for commercial purposes and a precedent is established which will be cited by other interests. Our National Parks are rich in forests. With the waters and mountains they constitute the chief attraction to the tourist. Destroy them there would be little or no water. But the lumbering interests look upon them with envious eyes, and if the water-powers are to be exploited by the hydro companies, why not the forests by the lumbering interests?

So, too, some of the National Park areas are believed to be rich in minerals, but what would become of these parks if unsightly mining camps, with their piles of refuse, oil derricks, ugly mine buildings, and all that is inseparable from mining camps and towns were allowed to spring up within their borders?

But if the door is opened to commercial exploitation in one direction, it will be well-nigh impossible to stop it in other directions.

The water-powers, the forests and the minerals within our National Parks undoubtedly have a commercial value, but so, too, have the Parks themselves in their natural state of beauty. Commercial exploitation of the forests would in a few years lessen and in time destroy their value. Cutting of the trees would lower and ultimately destroy the lakes, rivers and waterfalls. Mining operations in time would exhaust the minerals. Commercial hazards in the National Parks would mean a gradual depreciation in values.

But retention of our National Parks in all their natural beauty will add to their commercial value to Canada as magnets which will attract ever increasing numbers of tourists from all parts of the world, while maintaining for Canadians of future generations the delights and benefits of great national playgrounds, places of inspiration, and of health-giving happiness.

It is well, therefore, that the new National Parks Act has become the law of Canada. In this Dominion, as in the United States, we must face the fact that commercialism is the peril of our National Parks system. The almighty dollar, declared by Washington Irving to be the American god, is the obtruding deity. The struggle is between the lower and the higher, the sordid and the ideal.

Speaking for the then president of the United States at the annual opening of the Yellowstone National Park in 1923, Dr. John Wesley Hill said: "Regardless of all facts and figures, arguments, appeals and threats, any plan however meritorious on its face for the commercial exploitation of parks must by the very nature of its aims and purposes be immediately doomed to failure. Good projects, bad projects, indifferent projects, all must face the same fate, for it is the established policy of the Government that our national parks must and shall forever be maintained in absolute, unimpaired form, not only for the present, but for all time to come. This fixed policy will not be swerved a hair's breadth by any influence, financial, political or otherwise. If rights are granted to one claimant, others must follow, so a precedent must not be established. It would inevitably ruin the entire National Parks system."

Canada can do no less, and if any attempt is made, no matter in what guise, to infringe upon the rights of all the people in their National Parks, they should arise in their might and end any such attempt. The power is now in their hands by virtue of the new National Parks Act.

Atlantic Sardines

Atlantic sardines are the young of the herring which in immense numbers frequent the waters of the Grand Manan and Passamaquoddy Bay districts in New Brunswick.

Grows Peanuts and Almonds

On the farm of J. Prout, one mile from Portage la Prairie, peanuts and almonds have been grown this season —two sacks of peanuts and several pailfuls of almonds.

Seek Lower Rate On Cattle Shipments

Negotiation For Decrease In Transportation Charges On Exports To Britain

Hon. Robert Weir, Minister of Agriculture, is in negotiation with the Atlantic shipping companies and the railways in an effort to obtain a decrease in the transportation charges on cattle exported to Great Britain, which will open up this market to large scale shipments from western Canada.

The negotiations have not proceeded far enough to warrant any forecast of results. Mr. Weir, however, has got to the point where he is advocating an entirely new policy, endeavoring to change the whole basis upon which rates have been imposed in the past.

In regard to the ocean rate, Mr. Weir is endeavoring to have the whole rate basis changed. He wants shipping companies to quote rates by the ton instead of by the head. Such an arrangement would give shippers advantages in shipping stock of various weights. A definite decision in this regard will be reached before long.

When Languid And Anaemic

When a girl is languid, dull and irritable; when her color fades you may be sure her blood is impoverished. When a girl's blood is poor her nerves are starved and there is serious danger of a decline. Rebuild the blood, strengthen the nerves and good health will follow.

Dr. Williams' Pink Pills are of untold value as a blood-builder. Concerning them Mrs. John Finin, Howlan Station, P.E.I., says: — "My daughter was badly run down; pale, nervous and under weight. We decided to give her Dr. Williams' Pink Pills. After a few boxes she gained in weight, her appetite improved and color came to her cheeks—in fact she fully regained her former good health."

You can get these Pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

For Underwater Safety

Invention Ensures Escape From Submarines At Great Depth

R. H. Davis has perfected an invention which will enable escape from submarines far under the sea. The invention consists of a breathing bag which is supplied oxygen by a small cylinder of oxygen fixed below it. Poisonous carbonic acid gas of the exhaled breath is absorbed by a cartridge of soda lime. A special suit containing the breathing apparatus is donned in case of accident under the water. It has been tested at a great depth.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to healthfulness, all the discomforts and dangers of worm infection are removed, and satisfactory growth is assured.

New Aircraft Engine

A revolutionary type of aircraft has been developed in South Africa. The weight of the engine per horse-power is said to be from a quarter to a third less than that of other engines. It is said to have no rods, crank-shaft, shaft reduction gear or timing gear, and that there are only one-sixth the usual number of parts.

Minard's Liniment aids tired feet.

A Garden Of Sorts

He had been to the manager's office to ask him for the day off so that he could dig up his garden.

"But, my good man," said the manager, "Jones told me only the other day that you hadn't got a garden."

"Well, someone must have taken it off the window-sill," was the calm reply.

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

Wanted To Be Polite

A few days ago, a gentleman called what he supposed to be the telephone number of a friend downtown, and asked to speak with him. "I'm sorry," a young lady's voice informed him, "we have no one of that name here. "This," she continued "is the office of Davis, Polk, Wardwell, Gardiner & Reed." This, it happens, is the name of a prominent law firm. The gentleman may or may not have realized this, but at any rate he was stunned by the lengthiness of the title. He made the first remark he could think of. "I—I hope they're all well," he ventured, and hung up.

Keep Highway Open In Winter

No. 1 Highway Between Winnipeg and Brandon May Be Open For Winter Travel

No. 1 highway between Winnipeg and Brandon may be kept open all winter for auto traffic it is stated. To combat the heavy snowfalls that closed the highway early in 1929-30 winter months, the department will probably use two large snow plows of new design, with one of the units stationed at the western end of the highway here and the other working west from Winnipeg. Should the task of keeping the highways not be overly heavy, there is every probability of the Minnedosa-Brandon-Boissevain route being kept open too.

For some years now there has been an effort to secure snow-fighting units that would work effectively on the highways. The Retail Merchants Association and the Board of Trade co-operated for two winters in a work that kept roads into Brandon from neighboring districts open. Since that time the department has been approached to establish a more permanent force for winter road maintenance and plans are now shaping in that direction. In view of the importance and the amound of traffic over the Winnipeg-Brandon highway this route will get first attention in the new scheme for all-year-round traffic.

Relieves Asthma At Little Expense. Thousands of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply it.

For Uniform Text Books

Elimination Of Foreign Produced School Text Books Greatly To Be Desired

Reporting intensive activity in the elimination of foreign produced school text books from the schools of the country, the education committee of the Toronto Chamber of Commerce expressed the opinion that there is an ever growing tendency on the part of both the education authorities and the Canadian public to favor wherever possible, text books edited and published by Canadian and British authors and houses.

From a special committee formed in Alberta, came the suggestion, that since the individual provinces have complete charge of education, the provincial ministers of education could probably participate in a round table conference for the purpose of reviewing the text books situation in Canada and of seeking as much uniformity as possible.

Persian Balm — the unrivalled toilet requisite. Essential to every daintily woman. Imparts rare charm and beauty to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Cools and refreshes. Relieves roughness. Ideal for true feminine distinction. Delicately fragrant. Swiftly absorbed into the tissues, leaving no stickiness. Persian Balm lavishly creates a subtle elegance and charm.

Teacher: Now, in getting the meal, what is the first and most important thing?

Class (in chorus): Find the can-opener.

Russia, with a greater population than the United States, has only 9,000 automobiles.

Conquers Pain

The ideal rubbing liniment for muscles or joint pains; for swellings, sprains and rheumatism.

MINARD'S "KING OF PAIN" LINIMENT

Sat On Top Of World

Few Canadians Had This Experience During Eclipse Of Moon

Men who literally sat on top of the world for a moment are described by Dr. Willard J. Fisher, of Harvard Observatory in a report just published on the 1927 moon's eclipse.

These men were a far-flung line of fur traders, trappers, missionaries and hunters in Northern Canada, and at the moment of total eclipse their shadows were exactly on top of the round, black shadow of the earth as it slipped over the face of the moon, 240,000 miles distant.

A 100-inch telescope might have shown there the rough outline of the hills around them cast in the upper edge of the shadow on the moon.

Astronomers wanted to know just how much sunlight passed over this top edge of the world horizontally through the earth's surface atmosphere. To figure this they needed weather, cloud and haze conditions along this rim. George A. Wendt, of the Canadian Westinghouse Company, Limited, established the KDKA short wave broadcast to reach the men on the "rim" by radio.

They were advised two months in advance what the astronomers wanted. Radio was the only way to reach them. Months after the eclipse Dr. Fisher received the report, and now after long computations, their astronomical value has proved up. They show that clouds shut out light horizontally across this top of the world to a height of 2,000 meters, more than a third of a mile. This cloudy layer was almost as opaque as solid earth, and had few breaks.

Commends Development In Transportation

Visitor To Canada Amazed At Railway Facilities In Dominion

Delighted with what he had already seen of Canada and expressing amazement at the developments which have taken place in transportation facilities in the Dominion, Gordon B. Roelph of "The Examiner" and the "Weekly Courier," of Launceston, Tasmania, left Montreal on "The International Limited" of the Canadian National Railways, for Toronto, en route to Vancouver to sail for home.

Radio and telephone connections to and from moving trains were an amazing development to him, Mr. Roelph stated, while the speed of "The International Limited," six hours for the 334 miles journey between Montreal and Toronto, was one at which he had never anticipated travelling over such a distance on any Canadian railway.

Will Co-Operate With Agricultural Interests

Trades and Labor Congress Anxious To Give Their Support

Unqualified support was given to the World's Grain Exhibition and Conference to be held in Regina, July 25th to August 6th, 1932, by 300 delegates attending the 46th annual convention of the Trades and Labor Congress of Canada at Regina recently. A resolution approving of the exhibition, and conference carried unanimously, the delegates declaring their support to be an expression of their desire to co-operate with the agricultural interests of Canada in all great undertakings the objective of which is to strengthen the economic and industrial position of the Dominion among the nations of the world.

Athletes recommend Minard's Liniment.

"Pawgomow" In Cree

Conjuring Creek, the curious name of a northern Saskatchewan river, was first suggested by that of Wizard Lake from which it flows. The Cree name is "Pawgomow."

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Findlater, Sask., writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Will Ship Fish By Airplane

Aerial Transportation To Speed Up Deliveries From Northern Waters

Another western industry is to be aided by the airplane. Freshly caught fish from the lakes in northern Saskatchewan are to be transported by swift airplane to the Canadian and American markets, according to plans now under way by the Brooks Construction and Transportation Company, of Prince Albert. R. D. Brooks, manager and owner of the company, left Winnipeg recently for Detroit to take delivery of a seven-passenger Buhl air sedan, which will be the first of a fleet of airplanes to be put on the northern Saskatchewan fish route. Three airplanes are on order now, Mr. Brooks stated, and others will be added to the fleet as the business develops.

Mr. Brooks, who has been in the northern transportation and fish business for years in the Prince Albert district, is optimistic on the use of the airplane in the fish industry. Dogs and horses, he said, had previously been the means of getting his product out to market, and recently caterpillar tractors had been used in speeding up transportation. Now, he said, the airplane would be available to annihilate the long distance between the northern lakes and the Canadian and American markets. Fish caught at Lac La Ronge and Pipestone Lake, approximately 300 miles north of Prince Albert, will be on the Winnipeg market in less than 24 hours, according to an airplane schedule mapped out by the Brooks Company. Hitherto it had taken 22 days with horses and 14 days with tractors to get the product to a railhead. The Brooks Transportation and Fish Company handles from 500,000 to 1,500,000 pounds of fish per season, and Mr. Brooks states that approximately 200,000 pounds of choice fish will be shipped by airplane express at the commencement of operations. About 200 men are normally employed by his company in the fishing operations and it will be possible to add another 75 men to the pay roll with the use of airplane transportation, as it will permit the company to harvest a much greater catch.

Money In Raising Geese

Requires Very Small Investment and Comparitively Little Labor

Geese raising does not receive the attention by the farming community that the business warrants, asserts poultry experts of the Dominion Department of Agriculture. The farm is the natural habitat of the goose, providing those two great essentials to successful geese raising — free range and an abundance of green foods. Raising a flock of geese is one means by which the farmer can reap a good reward with a very small investment, and comparitively little labor. Geese command a good price on the Christmas market and the demand is always greater than the supply.

More To Talk About

The motorist adopted pleading tactics.

"I wish you'd overlook it this time, constable," he said. "As a matter of fact, I was hurrying to town on very important business."

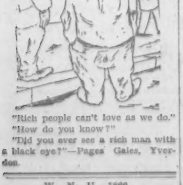
"Praid I can't help that," said the policeman.

"I never drive fast as a rule. But I've got to get to town quickly to see my solicitor—"

"Well," said the policeman, "you'll have a bit more news for him now."

Skim Milk For Hens

Feeding tests at the Cap Rouge Experimental Station of the Dominion Department of Agriculture show that it pays to feed laying hens skim milk. Five year tests show that with a basal ration of grain meal, shell and vegetable feeds, hens fed skim-milk laid more eggs and gained more in weight than hens fed beef scraps. Incidentally the cost of skim-milk is just one-ninth that of beef scrap.



"Rich people can't love as we do."
"How do you know?"
"Did you ever see a rich man with a black eye?"—Pages Gaies, Yverdon.

Frenchman Invented The Sewing Machine

Worked For Years Before First Model Was Perfected

Progress moves down uncharted paths. One hundred years ago, mobs in Paris smashed into bits the first model of the invention that the little manufacturing town of St. Etienne, 180 miles southeast of Paris, home of the inventor, is this year joyously celebrating, relates the Christian Science Monitor. For what the Parisian garment makers of 1830 thought threatened to steal their work, today gives employment to thousands upon thousands the world over.

Barthelmy Thimonnier, a tailor was inspired by the longing to "lighten the burden of those who sewed." Although he knew nothing of the elements of mechanics, he set to work and in years of effort managed to build a crude forerunner of the electrically operated, easily handled sewing machine of today. A vast number of industries such as the manufacturing of shoes, gloves, hats and wearing apparel of all kinds owe their huge growth to Thimonnier's invention; a legion of articles from books to airships has been fashioned in part by its flying fingers. The modern machine is capable of 3200 stitches a minute—contrasted with the twenty or thirty stitches a hand worker can take. One modern manufacturer alone makes 3,000 different types. How 2far it must surpass the humble Thimonnier's wildest dreams!

Thimonnier's right to the title of "originator of the sewing machine" is established by his patent date of 1830, fifteen years before Elias Howe, often credited with the invention, completed his device. Thimonnier subsequently improved his machine, and other men after him worked toward its perfection, but now it is common household equipment.

Thus progress, though unforeseen and unimagined, moves steadily on, and the town which in the last century feared and reviled Thimonnier as the "enemy of thimbles" today honors and extols him as inventor of the indispensable sewing machine.

A Costly Ounce

Radium is the most costly mineral in the world. In order to find this valuable mineral tons of earth are sifted before a grain of it is discovered. In Czecho-Slovakia, three hundred men employed in a chemical plant labored for eight years to produce an ounce of radium. One year's output at this rate is valued at about $2,500,000.

Success With Fruit

On the Canadian Pacific Railway Farm at Brooks, all kinds of fruits are growing, including apples, plums, cherries and grapes. By a system of grafting and crossing, some fine samples of crab apples, large apples, and plums have been developed and are bearing abundantly.

American soda fountains are being installed in France.

WORLD'S OLDEST CITIZEN

Zaro Agha, aged Turkish visitor to New York, whose alleged age of 156 has aroused wide interest, lies in a metropolitan hotel in a critical condition, suffering from injuries sustained, when struck down on Broadway by a hit-and-run motorist.

Banana Prices Lower

Reduction In Wholesale Price Of Close To 42 Per Cent.

Shipping of bananas direct from the British West Indies instead of through the United States has been largely responsible for reducing the wholesale price of this fruit in Canada by close to 42 per cent. during the past 12 months, according to government report.

In the one-year period ended August, 1929, imports of bananas totalled 3,774,845 bunches, of which 56.4 per cent. came from the United States and the remainder from the British West Indies.

In the past 12 months, this situation has been reversed, with 81.2 per cent. coming from the British West Indies. The reduction in price, however, is contrary to the general trend of prices for imported fruits, as the Dominion bureau of statistics index figure for foreign fruits was 112.4 in September last, as compared with 91.7 in September, 1929.

Mountaineer Surveyors

Twenty-Nine Peaks In Jasper National Park Climbed By Surveyors

In mapping the Dominion's mountainous districts the surveyor of today must be more than a surveyor only. He must be a mountain climber as well. One survey party of the Topographical Survey, Department of the Interior, in one season climbed 29 peaks in Jasper National Park in the course of duty. Of these twelve were over 10,000 feet above sea-level, including Nigel peak (10,525 feet); Sunwapta peak (10,865 feet); Poboktan peak (about 10,980 feet), and 36 other peaks over 9,000 feet above sea-level.

Record Production Of Salmon

British Columbia Pack More Than Double That Of Last Year

Present indications point to a record production of canned salmon in British Columbia this year.

The pack up to the end of the first week in September was 1,679,638 cases, or more than double the pack put up in practically the corresponding period of 1929, and upwards of 300,000 cases above the production up to approximately the same date of 1926, the record-making year in the British Columbia salmon industry.

With two months and more of operation yet to be reported, the prospects are that the total production of canned salmon this year will go beyond the 1926 record mark of 2,065,198 cases.

An outstanding feature of the 1930 operations up to the early part of last September is that the production of canned sockeye, the most valuable variety of British Columbia canned salmon, had reached 416,103 cases, or very considerably more than the total pack of this variety in any full year since 1915.

The pack of pinks is this year far beyond even the pack of 1928, when the previous record in pink production was made. In the full year 1928, the canneries put up 792,362 cases of pinks, and broke all records for pink production in the province, but by the end of August of this year the 1930 output had reached over 1,680,000 cases.

Dollar Value Of Agriculture

Few People Realize It Is a Big Business

Few people appreciate the dollar value of agriculture in Canada, or realize that it is really a big business. The Dominion Bureau of Statistics estimates the agricultural wealth of the Dominion as for the year 1929 at the huge sum of $7,978,633,000. This figure is made up out of the following estimated values: Lands—$3,316,061,100; buildings, $1,382,684,000; implements and machinery, $665,172,000; livestock, $864,167,000; poultry, $63,554,000; animals for fur farms, $10,477,000; and agricultural production, $1,067,218,000.

Canadian Troops Led Way

Gave States Splendid Example Says U.S. Minister To Canada

Striking tribute to the example set by the Canadian troops in the Great War was paid by Lieut.-Col. Hanford MacNider, United States minister to Canada. Speaking before 300 members of the Ottawa branch of the Canadian Legion gathered in his honor, the former national commander of the American Legion said: "You led the way; you showed us how and gave us a splendid example which we tried to follow. We in the United States have an admiration and gratitude for you which I feel is not often enough expressed."

Fashions change, but wearing of a smile is never out of style.

Train Telephone Service

Phone Service On Moving Trains In Canada Brought To Perfection

"The train telephone service in operation on Toronto-Montreal trains of the Canadian National system, has proved eminently successful," said J. C. Burkholder, chief engineer Canadian National Telegraphs, addressing the American Association of Passenger Traffic Officers Convention at Atlantic City.

"Since April 28, 1930," he stated, "The train telephone system has been operating daily on one train each way between Toronto and Montreal, namely, "The Maple Leaf," leaving Montreal at 9:30 a.m., and "The International Limited," leaving Toronto at 9:00 a.m. Since the service was inaugurated, there have been no interruptions to calls or circuits, nor time loss due to failure of any of the train telephone equipment. The Bell Telephone Company have recently commented favorably in a printed statement on the quality of transmission furnished by this system, stating that the service was 95 per cent. perfect, based on their method of computation."

"During the five months in which this system has been in commercial service," Mr. Burkholder continued, "a total of 813 calls have been handled, 766 of these originated on the trains for various cities in the United States and Canada. On one call, placed by a passenger to London, England, the transmission quality of the call was reported as 100 per cent. perfect. There were 47 calls for passengers originating from points as far away as Chicago.

Names Three Essentials

Federal Minister Of Agriculture Speaks On Improving Farming As An Industry

Speaking at the Canadian National Exhibition in Toronto, the Hon. Robert Weir, Federal Minister of Agriculture, named three essentials for the improvement of farming as an industry: First, the use of better blood in breeding stock to ensure better results from the same work and the same amount of feed. Second, more scientific feeding and where possible the purchase of cheaper feeds of equivalent value; and Third, the development of more highly specialized marketing, decreasing the spread between producer and consumer, insuring the best quality at a uniform standard to hold a market once obtained, and to develop a dependable volume of quality products. He further urged the farmer to eliminate waste wherever possible; and the exercise of sober, balanced, and constructive thought in relation to farm problems.

Canada Leads Aerial Surveying

Canada has for years led the world in aerial surveying, and during 1929 consolidated that leadership by applying, for the first time in any country, aerial methods to geodetic reconnaissance and transportation.

Wheat Straw Products

Methods Devised For Utilizing Wheat Straw That Now Goes To Waste

The plight of the wheat farmer during the past few years has been serious and threatens to develop into a major political issue. For every pound of wheat produced by the farmer there is also produced one and one-half pounds of wheat straw. The farmer tries to sell his wheat on a market which is surfeited, while the straw largely goes to waste. Can the wheat straw not also be economically used and thus carry its share of the cost of production of the entire plant?

A pioneer in the development of methods for using wheat straw in an industrial way is George H. Harrison, near St. Paul, Minn. Mr. Harrison has perfected a small plant for the destructive distillation of wheat straw whereby important organic chemical products are obtained from the gas and oil which are produced. Harrison claims that each ton of a mixture of oat and wheat straw produces on distillation 1,600 pounds of new, useful chemical products worth at the prevailing retail prices at least $250. When a ton of straw is burned in the open air all that remains is about forty pounds of ash which has only small value as a fertilizer. From the distillation products he obtains disinfectants, fly spray, straw oil, roofing and damp-proof material, straw carbon, paints and automobile top dressing. All these products are now being produced commercially. As the industry develops it should create a wider market for wheat straw, thus furnishing a new outlet for the products of the farm.

The destructive distillation of the wheat straw also produces a gas which has high value for running internal combution engines. Its bulky nature renders its use rather problematical. The straw carbon may also be used as a motor fuel and as an activator for gas engines.

Wheat straw also is well adapted for making insulating board, in growing demand each year from builders of houses, refrigerators and other devices where temperature control is essential. A modern pulp and board mill has been erected for this purpose near St. Joseph, Mo., and is now in operation. This firm is reported to be working on a twenty-four-hour schedule turning out 125,000 square feet of straw insulating board a day. — Robert Stewart in Barron's.

French Statesman Has Extraordinary Memory

Raymond Poincare Quotes Facts and Figures Without Effort

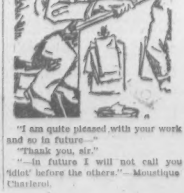
Raymond Poincare, one of the strong men of French politics, is said to have the most extraordinary memory among living public men. He has been known to speak for hours on end concerning the celestial intricacies of French finance without once referring to tables of statistics or printed texts. He stands before the Chamber of Deputies day after day spouting facts and figures of the most detailed sort effortlessly. "What is the use of arguing with him?" the members say; "he is always right." How does he do it? By hard work and application is his answer.

Not Satisfied With Session

Dissatisfied but not discouraged, the League of Nations assembly concluded its eleventh annual session after grappling for three-and-one-half weeks with international problems. Most keenly felt, perhaps, was the failure to accomplish the amendment of the League covenant so as to close its existing war gaps and thus advance to the stage in international dealing expressed in the Kellogg-Briand Anti-War Pact.

School Attendance Officer—"What is your husband's position, Mrs. Higgs?"

Mrs. Higgs—"Just me husband."



"I am quite pleased with your work and so is future—"

"Thank you, sir."

"—in future I will not call you 'idiot' before the others."—Moustique Charleroi.

WRECK OF THE ILL-FATED DIRIGIBLE

Above is reproduced a copyright and exclusive photograph of the wreck of the R-101, which was flown to London, England, from France by Pacific and Atlantic Photos, Inc., transmitted from London to New York by means of the Hartlane cable process, when it was telephotoed to Cleveland. The photograph, which has been retouched by an artist, shows the grisly frame of the R-101 rising grimly above the grave of its 57 victims after the giant airship had plunged to earth near Beauvais, France, and burst into flames, as a terrific memorial to Britain's greatest disaster. Among those who died in the wreck were Lord Thomson, Great Britain's air minister, and Sir Sefton Brancker, vice-air marshal.—Copyright 1930 by Pacific and Atlantic Photos

Make dresses bright as new!

DIAMOND DYES are easy to use; go on smoothly and evenly; NEW. Never a trace of that re-dyed look when Diamond Dyes are used. Just true, even, new colors that hold their own through the hardest wear and washing.

Diamond Dyes owe their superiority to the abundance of pure fruitless they contain. Cost more to make. Surely. But you pay no more for them. All drug stores—15c.

Diamond Dyes

Highest Quality for 50 Years

WORLD HAPPENINGS BRIEFLY TOLD

Alexander Harrison, of Philadelphia, one of the most noted United States painters, died recently after a long illness, in his Paris studio. He was 67 years old.

The U.S. weather bureau will issue fire warnings from a radio station near Madison, Wis., during the hazard season, it has been announced by the state department of agriculture.

Medicine Hat statistics show that only 210 dwellings in the municipality are occupied by tenants, the balance all being owned by occupants, thus establishing most unique Canadian record.

Plans to hold a re-union of the families and descendants of all former Presidents of the United States at the capital is being fostered in connection with the 1932 Washington bicentennial programme.

Canada will produce 45,260,000 hundredweight of potatoes this year, according to a forecast made by the Dominion Bureau of Statistics. Last year Canada's crop was 39,930,000 cwt.

Prohibition of advertising of hard liquor in Manitoba has been ordered by the Manitoba liquor control commission. In future, no advertisments will be approved by the board. The ban has been in effect since the beginning of October.

The association of South African Chambers of Commerce, in their annual congress, urged the government of South Africa to pursue a policy of intensive development of trade with the countries of the British Commonwealth.

Discovery of a Socialist bomb plot against the life of Marshal Joseph Pilsudski, premier of Poland, was announced by the semi-official Iskra Agency, and eight members of the Polish Socialist Party were arrested at Warsaw and accused of preparing the plot.

Two Catholic priests and a pilot were killed at Kotzebue, Alaska, when the mission plane "Marquette" crashed. The dead are: Ralph Wien, noted Alaska aviator; Father Philip I. Delon, head of Jesuit Missions in Alaska, and Father Walsh, of the Kotzebue Mission.

Samuel E. McColl, of McColl Brothers Surveying Company, was named director of surveys by the Manitoba Government. He will head a new engineering division operating under the Department of Mines and Natural Resources, formed in connection with the transfer of resources from the Dominion.

Build Big Bridge

Structure Over One Thousand Feet In Length Being Erected At Brosseau, Alberta

Work on the steel superstructure of the new traffic bridge across the Saskatchewan River at Brosseau, Alberta, which is being built by the Department of Public Works, has begun. The bridge is the largest that the department has built for several years, and will be one of the largest in the province, running to something over a thousand feet in length.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and must be continued. Others contain calomel and dangerous mineral drugs, which remain in the system, settle in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy.

A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move gently, the intestines are thoroughly cleansed and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red pkge.

W. N. U. 1860

Advertising Is Good Business

And Is Especially Necessary In Times Of Depression

It is a curious fact that the art of advertising at home is on as high a plane as in any country in the world—but manufacturers and merchants do not seem to have developed the faculty of showing the rest of the world how really good their products are. British traders are inclined, when bad times prevail, to reduce costs by cutting down advertising, a procedure which has been proved time and again to be against all the principles of good business. As was mentioned in a recent article contributed to our columns by a local advertising specialist, "Among experienced advertisers today, it has become an established policy to redouble efforts in bad times, because of the actual results which have been derived in so many instances from the adoption of this policy."—Hong Kong Press.

World's Grain Exhibition

Managing Director Now Touring European Countries To Create Interest In Show

For the purpose of interesting ministers of agriculture and producers' organizations in a number of European countries in the World's Grain Exhibition and Conference to be held in Regina in 1932, John A. Mooney, managing director, is now on a tour of the continent. His itinerary includes the countries of Czecho-Slovakia, Jugo-Slavia, Bulgaria, Roumania, Turkey, Greece, Italy, Spain, Portugal, France, Switzerland, Belgium and Holland; and he expects to be back in Canada by the middle of November.

Winnipeg Newspaper Union

Fashions

(By Eva Tingey).

PRETTILY DRAPED

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Delightful draped effects mark many of the new bodice and skirt effects, giving almost Greek grace to the voguish dresses.

The model illustrated for today's pattern has a new and charming collar. It forms a pretty drape on one side and is caught with a modern brooch or a button, preferably a jeweled one if the material is rich like satin, crepe-de-chine, marocain, chiffon velvet, etc. The model would also cut charmingly in a faconne velvet of which some lovely new designs are to be seen.

To be in keeping with the bodice trim, the skirt drapes prettily on one side where the weight of the fulness of stuff just causes the merest dip at the point. The belt is narrow and of self tissue.

This pattern may be obtained in sizes 14 to 20 and 34 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamp or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

"THEY WORK WHILE YOU SLEEP"

Should Check Up Unemployed

Some May Not Be Deserving Of Government Relief

Unemployment figures in urban centres are augmented each winter through the migration of men who work steadily on farms in the summer and rather than accept a smaller wage for the winter months or perhaps merely comfortable board they journeyed cityward in the hope of sharing in the jobs handed out by benevolent city councils. Urban municipalities should keep a close check on these migrants and refuse to increase the burden upon their municipalities and the country at large by maintaining these men in semi-idleness for five months out of the year.

It will be grossly unfair to taxpayers everywhere if part of the twenty million dollars appropriated by the Dominion Government and the thousands of dollars that are added to it by the provinces and municipalities is used to maintain the migratory class of laborer who has been offered winter employment and turns it down in order to share in the millions voted for unemployment relief.—Farmer's Advocate.

Recipes For This Week

(By Betty Barclay)

SCALLOPED TOMATOES

Drain one can tomatoes from some of their liquor. Season with salt, pepper, a few drops of onion juice, and 2 teaspoons sugar. Cover the bottom of a buttered baking dish with buttered bread crumbs, cover with tomatoes, and sprinkle top thickly with buttered crumbs. Bake in a hot oven until crumbs are brown.

LEMON TAPIOCA SHERBET WITHOUT FREEZING

½ cup quick-cooking tapioca.
1 cup sugar.
2 cups water.
Juice 2 lemons.
2 egg whites.

Put tapioca, sugar and water into double boiler, and cook, stirring often, until clear. Three minutes before removing from fire, add lemon juice. When cool and beginning to thicken, add the stiffly-beaten egg whites, and beat well. Serve with boiled custard or heavy cream.

Advocates Clothing Reform

College Professor Thinks Men Should Wear Dresses

Men should wear dresses, Prof. Albert Bachem, of the University of Illinois College of Medicine, advises.

For health and comfort the ideal garment for men would be loose and flowing, without binding collar or belt, he told the American Physician Therapy Association recently.

"We men, under our garments," he said, "are practically always living in a tropical climate. Women's clothing is much more reasonable.

"There are two ways I would suggest to improve our clothing. Either it could be made more porous and consist possibly of one layer, or it could be worn very loosely."

Yukon Big Game

Yukon Territory, Canada, is the paradise of big game hunters and no place on the North American continent today offers greater inducements both for the variety of big game and for the dimensions of the trophies to be secured. Mountain sheep, moose, goat, caribou, and bear are common. The moose are of the "giant" species, and bear includes black, brown and grizzly.

Manitoba Stone For Edmonton

The final shipment of Tyndall stone, from the Tyndall quarries in Manitoba, to Edmonton in connection with the $250,000 contract for the Alberta Provincial Buildings at Edmonton, has been made ahead of schedule.

Planning New National Park

Proposed Site In In Manitoba Near Clearwater Lake

The northern Manitoba mineral belt, already established in the commercial field, will have the furthest north national park in Canada if plans of The Pas Board of Trade are carried to fruition. A committee of prominent northerners is now engaged in taking the matter up where the Federal Government left off a few years ago.

The proposed site for the reservation is in the Clearwater Lake region. The lake is at Mile 17 on the Hudson Bay railway and is the most popular resort north of 53."

The national park agitation dates back several years, and it arises anew through the transfer of natural resources to the province of Manitoba. Word has been received from Winnipeg that the provincial authorities intend to re-survey the park site, and it is possible that the boundaries of the reservation will be marked out next year.

In the federal survey, no provision was made whereby holiday-seekers could title to lands to build cottages. The result has been that several summer homes have sprung up on property set apart for park purposes, and the problem today is to map out territory which will not inconvenience present cottages in the resort area.

The board of trade committee will investigate the whole situation, and after a report has been made to the board the matter will be presented to the Manitoba Government.

Clearwater Lake is an ideal summer resort in the hinterland. During two months in the summer, the water is warm enough for bathing, while fishing and boating are excellent. At present, the only connection with The Pas is via The Hudson Bay railway, but a motor road survey has already been started and the highway is expected to be completed by next summer.

Less Crime In Britain

Several Prisons Are Closed For Lack Of Occupants

Crime in Great Britain has deteriorated so much that prisons are operating far below capacity, and several have actually closed for lack of occupants, states Dr. Higgins, medical officer of the prison in Liverpool, who arrived in New York recently.

He attributed the decrease in crime to the system of swift justice, strict laws, requiring the closing of saloons at certain hours, and to the fact that a prisoner or a person fined for an offence is kept under close surveillance after his release or payment of the fine.

There was great excitement aboard the liner.

"Man overboard!" was the cry.

"Gentleman overboard, if you please," said Mrs. De Snobbs. "That's my husband."

Pencils are being sold by vending machines in Czecho-Slovakia.

World production of sulphuric acid now is 23,550,000 tons a year.

CANADIAN PACIFIC STEAMSHIPS

Finds Use For Muskeg

May Establish Industry To Produce Insulating Material

An American company with headquarters at Minneapolis, is investigating commercial uses for the northern muskegs with a view of establishing an industry to produce insulation material. While the prospect of using muskeg as an insulating material is something new to the majority of citizens of Canada, it is an old trick of the veteran prospectors in this area.

But hundreds of log cabins of trappers and prospectors in the northern areas of Manitoba and Saskatchewan have been packed with the bog material for years, keeping out both the freezing blasts of the northern winds and the burning sun of northern Manitoba to the entire satisfaction of the owner of the cabin.

No local information can be obtained regarding the investigations by the American firm of the industrial use of muskeg, but early in the spring a substantial shipment of the muskeg left here for the south.

Started In Small Way

The dahlia began its spectacular career most modestly in 1779 when a few seeds were sent from Mexico to Madrid. By 1841 some 1,200 varieties had sprung from this little packet of seeds (not bulbs—"a truly remarkable example," says Dr. Howe "of a plant's capacity for variation when aided by man." Today more than 8,000 varieties are in cultivation, thousands have been discarded and there is a dahlia society in every state.

Lawyer (handling cheque for $100 to client who had been awarded $500)—There's the balance after deducting my fee. What are you thinking of; aren't you satisfied?

Client—I was just wondering who got hit by the car, you or me?

Starts Mystery Flight

Great Secrecy Surrounds Destination Of British Woman Aviator

Mrs. Victor Bruce, British woman aviator, has started from Heston, Middlesex, air park, on a mystery flight in her single-seater Bluebird aeroplane.

The greatest secrecy surrounded her destination. One report credited her with the intention of flying east across Europe to Persia, India, China, and Japan. Another said that she was flying to Alexandria and then down to Cape Town.

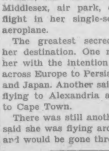
There was still another report that said she was flying around the world and would be gone three years.

When coffee was introduced into Europe as a novelty, it was said to be an effective remedy against hysteria and toothache.

USES PINKHAM MEDICINES

Praises Vegetable Compound, Blood Medicine and Liver Pills

Birchtown, Quebec—"I live 13 miles from town on a farm, with all my home



duties and churning to attend to. At the Change of Life, I became nervous and run-down. The Vegetable Compound helped my whole system. My nerves are better, my appetite is good and I am able to do my work. I have also taken the Blood Medicine and the Liver Pills and they helped me. I will answer letters from women asking about your medicines."—Mrs. Richard Charlton, Birchtown, Quebec.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARNS SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Too much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms, such as headaches, gas, heartburn, etc., will disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine, prescribed by doctors for conditions due to excess acid. It is always a liquid; it cannot be made in tablet form. Look for the name Phillips' and the word *genuine* in red.

THE DUSTY HIGHWAY

CHRISTINE WHITING PARMENTER

Copyright 1929

CHAPTER II.—Continued.

Considering all it meant it was over in an incredibly few minutes, but during the entire time Gay did not look at Nick. She looked at Lincoln, not alone because his familiar visage steadied her, but because if she kept her eyes upon him she couldn't see Josiah K. Miller's beard.

Somehow she found herself shaking hands with the owner of the beard, and nodding dazedly to the clerk and the stenographer. Somehow, with the help of Nick's firm hand, she got down the dark stairway, and into the blinding sunshine of the spring day.

Still she didn't meet Nick's eyes. The whole performance had been a nightmare—a hideous travesty of sacred things. She was hurt and quivering. She glanced down at the gold band on her fourth finger—wondered vaguely where Nick had got it, and realized in the light that she was married—married without the touch of her husband's lips. The thought that not once during the whole day Nick had been angling but brotherly, suddenly scorched her. Surely, had he loved her ever so little, he would have kissed her! And to let her be married in that dreadful place. . . .

Gay didn't know that her quick breathing was almost audible. She hardly knew that they were in the car again and had left the highway for a secluded street. She didn't notice that the car had stopped; but it was heard Nick say, a trifle hoarsely: "Gay—darling—if I'd known. . . ."

And just then a voice broke in upon them: a high shrill, old-man voice: "My gorry! If ain't Nick Hastings!"

They both stared, to behold a little man in baggy trousers and a wide-brimmed hat. He was carrying a huge umbrella, and looked to Gay like a character from Dickens; but Nick, beaming, stretched out a cordial hand.

"Why, hello, Mr. Bartlett! Aren't you a good way from home?"

"I be and I ben't," was the enigmatic answer. "Truth is, I've moved since last you come. Couldn't stand the noise from that darn railroad; but no place is ever goin' to seem home to me but the house where I lived with my old woman. This your lady, Nick?"

Nick grinned, and turned to Gay with the familiar light in his blue eyes again.

"Gay, I want you to know Mr. Bartlett, a good friend of mine. This is my—wife, Mr. Bartlett. I've been married since last you saw me. We—we're taking a little trip."

The old man lowered his umbrella and squinted up out of near-sighted eyes.

"Well, well. Pleasant time to be startin'. Some like fall, but I say, give me spring every time—spring an' apple blossoms. Ain't nothin' prettier. Where you aimin' to put up over night?"

"We haven't made any plans. That is, we—we started rather suddenly and——"

"I see, I see," interrupted Mr. Bartlett. "That's the way to do. That's the way we'd start out forty year ago, me and my old woman; only we went behind an old white horse. Say, why not use my camp?"

Nick stared a minute. "You mean that bully little cabin on the hillside? The place I found you when I brought over that mortgage for you to sign?"

His voice was eager, and the old man beamed.

"That's it. Awful pretty place to stop. I was there yesterday—cleaned her up—laid the fires—took up a lot o' canned goods, thinkin' maybe I'd be goin' to stay a day or so. May need a mite o' dustin,' but gorry! we done the Central House! You're welcome to stay long as you want to, Nick, that is, if your wife'd like it."

"You would, wouldn't you, Gay?" asked Nick eagerly. "It's the snuggest little place you ever saw; with a glorious view of the White Mountains from the porch. Of course, if you'd rather go to a hotel——" he added doubtfully, but Gay, who had regained her composure during this conversation, reassured him.

"It sounds beautiful. I'd like it much better than a hotel, and——"

"Well, that settles it!" interrupted the old man quickly: "Now if you'll take my umbrella (I had a sunstroke once, ma'am, and never travel without it), I'll hang 'onto the runnin' board and you can carry me back to the house—third from the corner, Nick, the white one, and I'll give you the key. No, ma'am, don't move. I like ridin' on the runnin' board. Makes me feel like a boy. It's lucky I went up yesterday and aired her out. The bed's all made, ma'am, and they's extry blankets in the chest. I'll give you a jar o' milk and some eggs. . . ."

He continued to rattle on, planning for them as happily as if they had been his children. It was, perhaps, the best thing that could have happened to them at just that moment. It brought them back to a sane and normal world, after that torturing ceremony in the office of the Justice of the Peace. When they left Mr. Bartlett waving a vigorous farewell from his front porch, they were themselves again.

"That old man does a lot of business with the bank," Nick explained when they turned a corner. "Rich as mud, he is, and quite a character. Mr. Maxwell used to send me over to get his signature, and for some reason the old codger took a fancy to me. Don't know why, except that I used to jolly him. Once I spent a whole day with him at his camp. Oh, Gay! I hope you'll like it the way I did! it may alone——"

He stopped abruptly, and drew her attention to some budding violets. A silence fell upon them, but it was a silence of understanding, not constraint. Once, indeed, Nick lifted the hand that wore his ring, slipping it beneath his own upon the steering wheel; and the act brought Gay a sense of security and well-being.

But they were children again when they explored the cabin. Nick declared that it was even more delightful than he remembered it; and insisted, with an ardent glance that brought color to Gay's cheeks, that the added charm was due to present circumstances.

"It's—perfect," she agreed.

They had finished their supper and stood together in the doorway, looking down through the pines that guarded their hearthstone, to where green woodlands bordered on greener meadows—where quiet lakes gleamed dully in the twilight, and mountains, blue and majestic, were silhouetted against the sky. The silence deepened. A star shone out—and then another. . . . Gay drew a tremulous breath.

"I feel—like a bird in its nest."

Nick's arm went round her shoulders, drawing her closer.

"A bird in its nest," he echoed. "Well——" He dropped the protecting arm, and faced her suddenly. "Gay—what have you thought of me all day? It came to me there in that abominable office, when—when you wouldn't look at me, that I hadn't behaved the way I should have. I suppose I was teasing myself a little. I didn't realize that I was teasing you as well. Do you remember when we were kids, Gay, and my mother'd sometimes take us on a picnic, how I always saved the choicest morsels for the last? I think, dear, it was that quality in my make-up, which kept me from kissing you today when I was tempted. I thought: I'll wait. Our first kiss shall be part of our wedding ceremony.' 'Ceremony! In that horrible place! Oh, Gay, don't you know that it hurts me as much as ever it hurt you? I thought: 'If only she'll look into my eyes I'll make her understand.' But you didn't look, dear, and—and of course I couldn't kiss you there! And when we got outside it was hard to speak. I was scared, honestly, scared of what you must be thinking.—Gay—dearest—let's forget it, and——"

"Forget —our wedding?"

"Yes, if you call that miserable affair a wedding. I don't. I think it takes something more than a slovenly bailiff of the Peace, and the signatures of a gum-chewing girl and a vulgar little clerk, to make a marriage. God's a good enough witness for me, Gay, and I promise you now that I'll love you—and honour you—and be true to you, dear, 'until death us do part.'"

His eyes met hers in a long and steadfast look.

Mutely, she stretched out her hands, and holding them in a warm clasp against his heart, Nick kissed her.

CHAPTER III.

A week later they were on their way, though strangely, it was Nick who protested at a change when Gay suggested that they had accepted Mr. Bartlett's hospitality long enough. She was seated on the ground beneath a pine tree, while the boy lay at her feet, idly running the brown needles through his fingers.

"But I could stay here forever!" he exclaimed, and his regret at leaving "The Bird's Nest," as Gay had christened their first stopping place among the trees, was so apparent that the girl smiled.

"Forever?" she queried. "And what's to become of the ends of the earth you were seeking?"

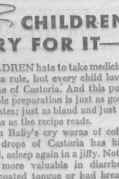
He straightened up, looking at her with what she secretly called his "new look"—not the comrade-look she had grown up with, but something dearer.

"It sounds rather far away—the ends of the earth," he admitted. "I won't say that it doesn't call me, but in the last week I've discovered qualities I didn't know that I possessed. Perhaps I'm becoming tamed! If I'd had the sense to discover you before, Gay, we'd be living contentedly in my late uncle's house on Elm Street, and you'd be kissing me good-bye each morning at eight-fifteen, when I started for the bank."

(To Be Continued).

Potatoes For Drouth Area

Through the generosity of North Battleford branch of the Canadian Legion, members of the Assiniboia branch who, through drouth are hard hit and in need, will receive assistance in the gift of a car load of potatoes, that have already been shipped from the northern city for distribution in the district.



CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

Holds Unusual Degree

Canadian Girl Is Master Of Science In Aeronautical Engineering

Miss Elsie Gregory MacGill of Vancouver, can now write the letters M.S.E. after her name besides the more familiar B.A., and B.Sc., for she graduated not long ago from the University of Michigan in Ann Arbour, with the degree of master of science in aeronautical engineering.

When Miss MacGill entered the graduate school of Michigan, she already had the degree of bachelor of science from the University of British Columbia, and another degree in engineering from the University of Toronto.

Toronto fellow graduates will recall her as the only girl student at the school of practical science and when she graduated in engineering, a specially small iron ring had to be made for her finger, as none of the regulation pattern were of any use in this emergency. It was Miss MacGill's intention to be an electrical engineer, but later this young British Columbian turned to aeronautics.

Professor Felix Pawlowski, who holds the chair in aeronautical engineering in the University of Michigan, says that during her course at Ann Arbour, Miss MacGill displayed not only admirable qualities of character, but also "rather an unusual ability for engineering in general." Her work was of such high standing, and she was so generally appreciated by her professors, that in spite of the fact that her health broke down a month before the end of her scholastic year, thus interfering with some of the duties assigned to her, "everybody, nevertheless was satisfied that she receive the degree."

Mice MacGill is particularly interested in design of aeroplanes, having already had a certain amount of experience in this direction which she acquired before going to Ann Arbour, and she is planning to continue this line of work with the aeronautical industries of Canada as her health permits renewed activities.

The most interesting fact in connection with the brilliant Canadian girl is that she is the first woman on this continent to hold a degree in aeronautical engineering, "and very likely," says Professor Pawlowski, "the only one in the world at the present time." As near as I can say my knowledge, ' the professor adds, "there are only two women with proper theoretical training in Europe one in England and the other in Poland—engaged in aero-dynamic research of rather mathematical character. These two women, however, have no degrees in aeronautical engineering."

Douglas' Egyptian Liniment is without a rival. Stops bleeding instantly. Cauterizes wounds and prevents blood poisoning.

Innovation On Liner

Passengers Can Talk Direct To Europe Or America

Direct conversation by wireless telephony from passengers' bedsides to Europe or to the North American continent whilst en route will be one of the principal features of the "Empress of Britain," gigantic Canadian liner to be completed June, 1931, according to W. H. Annable, assistant steamship passenger traffic manager, Canadian Pacific Railway.

It is expected that the 42,000-ton giantess will occupy only five days on the regular Southampton-Quebec run, and is scheduled for a cruise of the world next year.

Canadian Egg-Laying Contest

The pen of Barred Plymouth Rocks entered by Mrs. W. J. Thompson, of Birch Hill, Saskatchewan, continues to lead in the 11th Canadian Egg Laying Contest at the Dominion Experimental Farm in Ottawa, with a score of 1,770.1 points. The pen lead is now 46.9 points ahead of the nearest competitor, with only a few points separating the second and third.

Visitor—"You seem to have been very lucky in your shipwrecks."

Ancient Mariner—"I 'ave that, sir. Why, would you believe it, I was once marooned on a desert island with a case of whiskey an' a chap 'oo was a staunch teetotaler."

New Paving Material

City Of Calgary Experimenting With Bituminous Sands

An experiment with bituminous sands from the Fort McMurray district in Northern Alberta was being tried in the city of Calgary public works, it was stated recently by Commissioner A. G. Graves, following a visit from a representative of the company which is exploiting the sands.

About 30 tons had been ordered, he said, and some of it was already in use for crossings, sidewalks, and so forth. It had been found necessary to mix it with sand and gravel according to a formulae decided upon by city chemists, but even with the added labor of mixing the product was very economical for the use to which it had been put. Commissioner Graves was not prepared to say anything just yet about the lasting qualities of the material, but said that it appeared to be giving satisfaction. Further experiments would have to be made before it was decided to extend the use of it to roads.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make nothing easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Riot Caused By Umbrellas

Indian Low Castes Carried Them For a Day

A job lot of western umbrellas and shoes caused a riot on the Laccadive Islands, 150 miles off the Malabar coast. The Koyas, or aristocracy of the islands, long ago decreed that they alone might go shod and carry umbrellas but when the western shipment came in the Malumis, or sailor caste, and the Melacheris, who pick cocoanuts, decided to try dressing up. They picked 11 Melacheris and nine Malumis to defy the old edict and it was a gala day for the visiting low castes until the Koyas' chief heard about it and ordered out his spearmen. After the fight the mannequins found themselves in jail.

Minard's Liniment has a hundred uses.

There weren't so many complaints about hard times when a man didn't consider it a disgrace to go around with a patch on his pants.

"What steps ought to be taken," asks a writer, "to reduce the number of street accidents?" We suggest long, quick ones.

DEPRESSION

"I'm a different woman"

"Two years ago I began to get depressed, and everything was too much trouble for me. I was a misery to myself and everyone around me. I was advised to take Glauber Salts by my friends who said it was the same as Kruschen but it did me no good, so at last my husband got me a bottle of Kruschen and no one would realise the different woman I am. I have been taking Kruschen now constantly for two years. My daughter also would not be without it. I have got my neighbour to take Kruschen as well and she has found its worth as she feels a different woman."

—(Mrs. G. A. K.)

The commonest cause of depression is *partial* constipation—an insidious complaint because the sufferer is seldom aware of it. It means the gradual accumulation of body poisons which dull the mind, damp the spirits, sap the nervous strength and lower the whole vitality.

Kruschen Salts make constipation impossible. Therefore, if you keep to Kruschen you need never know the meaning of melancholy; never feel "nervy" or depressed.

Little Helps For This Week

"Whatsoever thy hand findeth to do, do it with thy might."—Ecclesiastes IX. 10.

So the work that's nearest,
Though it's dull at whiles,
Helping when we meet them
Lame dogs over stiles.

—Charles Kingsley.

Few are needed to do the out-of-the-way tasks which startle the world, and one may be most useful just doing common-place duties, and leaving the issue with God. And when it is all over, and our feet will run no more, and our hands are helpless, and we have scarcely strength to murmur a last prayer, then we shall see that instead of needing a larger field we have left untilled many corners of our single acre, and that none of it is fit for our Master's eye were it not for the softening shadow of the Cross.—George Macdonald.

An Oil Of Merit. — Dr. Thomas' Eclectric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

Up-Keep Is Expensive

Costs More To Run New York City Than Canada

The 1931 budget of New York City will mount to a new high record of at least $632,600,000, a survey of New York's expenses, past, present and future, indicated.

This would amount to $67,630,272 more than the budget for the current year and would be the greatest increase in the history of any city anywhere.

The entire governmental expense for the Dominion of Canada in 1929 was about $281,400,000 in round figures below the city budget that is expected in 1931.

Motorist: "That garage man says we're carrying entirely too heavy a load."

Back Seat Adviser: "Couldn't you throw out the clutch, dear?"

HEAD HURT?

WORK won't wait for a headache to wear off. Don't look for sympathy at such times, but get some Aspirin. It never fails.

Don't be a chronic sufferer from headaches, or any other pain. See a doctor and get at the cause. Meantime, don't play martyr. There's always quick comfort in Aspirin. It never does any harm. Isn't it foolish to suffer *any* needless pain? It may be only a simple headache, or it may be neuralgia or neuritis, Rheumatism, Lumbago. Aspirin is still the sensible thing to take. There is hardly any ache or pain these tablets can't relieve; they are a great comfort to women who suffer periodically; they are

always to be relied on for breaking up colds.

Buy the box that says Aspirin and has Genuine printed in red. Genuine Aspirin tablets do not depress the heart. All druggists.
